(A) Per-phase corruption
labeled corruption
unlabeled spikes
thresholds
Sequence-parity statistic, PMU 2
Time (s)
(B) Network-coupling test
c_{39}
c_{29}
three-phase fault, bus 39
unlabeled excursion, PMU 29
Largest change at other PMUs
Balanced change at dominant PMU
(C) Information without one PMU
load
line
alarm evidence
$\Lambda^{(-p)}/\lambda^\star$ in 1 s
Missing or corrupted PMU (bus)
